Profile

Highly skilled Flutter Developer with 2 years of experience in designing and developing 14+ cross-platform mobile applications. Proficient in Dart, Node.js, MongoDB, and Express.js, with a strong focus on building responsive, user-friendly, and scalable applications. Adept at collaborating with cross-functional teams, integrating third-party APIs, and optimizing code for performance. Passionate about leveraging technology to deliver impactful solutions across diverse industries.

Skills

Mobile Application Development, State Management (GetX, Bloc), Performance Optimization, Responsive UI Design, Cross-Platform Deployment (iOS & Android), Android Studio, Visual Studio Code, Dart, JavaScript, Node.js, Express.js, MongoDB, RESTful APIs, Handling API Responses, JWT Authentication, Isolates in Flutter, Performance Tuning, Next.js, Vercel for API Hosting, Firebase Integration, Custom Widgets Creation, Web App Development, GitHub Workflows & Actions

Professional Experience

2024/05 – present
Noida, India

Mobile Application Developer

Livekeeping - An IndiaMart Company

Optimized Flutter application codebases to enhance performance and refined user interfaces for improved user experiences. Successfully deployed applications as web apps for demonstration purposes, showcasing their cross-platform versatility. Leveraged isolates for efficient data processing and implemented GetX for state management, resulting in responsive and maintainable applications. Integrated Method Channels and Event Channels for seamless communication between Flutter and native code, and developed features to keep applications active in the background for uninterrupted functionality.

2023/11 – 2024/05
Mohali

Mobile Application Developer

ToXSL Technologies Private Limited

As a mobile application developer, I excel in leveraging GetX State Management and Dio Client for efficient state handling and RESTful API integration. With extensive experience leading and contributing to 8 projects, I thrive in dynamic teams of around 12 members and have successfully launched numerous applications on both the Play Store and App Store. My robust background highlights advanced technical skills, effective teamwork, and a proven track record of consistent project delivery in mobile app development.

2022/12 – 2023/11
Mohali

Mobile Application Developer

Meta Extended Reality

Experienced Mobile Application Developer with a proven track record in building robust applications for both Android and iOS platforms. Proficient in Kotlin and Java for Android development, and skilled in using Flutter for cross-platform solutions. Adept at implementing WebView functionality, integrating Firebase Database and Firebase Auth for seamless data management and user authentication. Expert in RESTful API integration and state management with Provider. Demonstrated ability to design intuitive user interfaces that enhance user experiences and drive engagement across platforms.

Education

2019/08 – 2023/07 **Bachelor of Technology (CSE)**
Maharaja Agrasen University

Projects

2023/03 – 2023/05 **Taxi Booking Application** 
Convenient taxi booking app with user-friendly interface and reliable service.

2023/05 **Business Card Scanner** 
Efficient business card scanner with accurate data extraction and seamless integration.

2023/06 – 2023/09 **StaffHub - MXR** 
Streamline and optimize workforce management with our intuitive application, enhancing scheduling, communication, and productivity.

2023/10 – 2023/11 **Muzlimz**
Played a key role in enhancing user experience through effective user interface design for the Muzlimz application.

2023/11 – 2023/12 **Sheikh Property**
Revamped the user interface and implemented Restful API calls for the Sheikh Property project, facilitating seamless property listings and investment functionalities.

2023/12 – 2024/01 **MyCaho Guest and Host** 
Skilled in UI development using Firebase, specializing in seamless user experiences, in-app communication, and efficient booking systems for diverse services. Proven expertise in creating robust user-initiated request systems, contributing to the success of innovative platforms.

2023/12 – 2024/01 **KuchBhiChahiye**
Developed “Kuch Bhi Chahiye,” a Flutter-based home delivery app with cross-platform functionality and efficient backend features, currently enhancing user convenience.

2024/01 – 2024/02 **Yamas**
Contributed to the “Yamas” project by implementing booking features, a request system, in-app communication, and enhancing user experience with chat and ratings.

2024/03 – 2024/05 **Vasils**
Focused on restaurant services, developing ordering, real-time tracking with Google Maps, and user/driver modules to enhance platform efficiency.

2024/06 – present **Livekeeping - Tally on Mobile**
Contributed to the “Livekeeping - Tally on Mobile” project, integrating Tally data into user profiles, optimizing performance, reducing latency, and creating a smooth user interface and replicated the same for Flutter Web.

2024/12 – present **Livekeeping - CRM**
Worked on an internal project for the sales department, implementing features for lead management, including call functionality, lead listing, updating agent activities, and tracking agent performance.

Awards

2023/01 **Employee of Month**
MXR
Achieved the Employee of the Month recognition within the first month of joining my inaugural company, underscoring a rapid and impactful contribution to the team.
